

CITY OF THE SUN

Formed in 2011, City of the Sun features guitarists John Pita, Avi Snow, and percussionist Zach Para. The band's sound has an array of influences including indie rock, American folk, flamenco, and blues; it's been called worldly, cinematic, a mix between Rodrigo y Gabriela and Explosions in the Sky.

COS has since been established as a powerhouse group in the post-rock sphere. They've sold out New York's top indie venues Brooklyn Steel, Irving Plaza, Bowery Ballroom and Gramercy Theatre; toured with Peter Bjorn & John, G.Love, STS9, and Thievery Corporation; were featured emerging artists at Panorama NYC, Billboard's Hot 100, Firefly, Bottle Rock Napa music festivals; and scored "The C Word" documentary soundtrack (directed by Meghan O'Hara and narrated by Morgan Freeman).

After completing two European tours including major sold-out shows in Athens, Greece, the band released UNTITLED EP. Lead track "Perfect Instance" has gained 24 million Spotify streams to date, contributing to over 80 million plays on the platform overall.
